

Erupting Car Wash

What you need:

- baking soda
- vinegar
- food coloring (optional)
- soap
- water
- toy cars
- can use and under the bed bin or out in the grass
-

Kids can carefully pour the vinegar into the baking soda until we a reaction forms, then drive the cars through it!

Continue this process, driving the cars through the goop and playing with the ingredients.

After a good dip in the baking soda and vinegar, the 'dirty' cars can make their way to the warm, soapy water.

It's amazing how much fun pretending to wash some toys are- and believe it or not, all of our cars are now squeaky clean!
