

Making A Bubble Machine

Instructions

- Poke a hole with a pencil in your paper cup, about 1 inch from the bottom.
- Stick the straw through the hole and push forward, but don't let it touch the other side. Have the bendy portion on the outside of the cup, facing up.
- Use masking or duct tape to secure the straw on the outside. Make sure you've plugged any cracks so the straw doesn't leak.
- Pour dish soap into the cup, enough to cover the straw. Make sure the bendy part of the straw is pointing up or the soap will pour out.
- Add 2 tablespoons of water.
- Add a few drops of food coloring if you'd like colored bubbles.
- Gently blow through the straw and watch the bubble overflow (this is best done outside).
- You may choose to decorate your bubble machine with markers, stickers, etc.
